University of Warwick

2016 - 2020

Bsc in Mathematics and Statistics

Newham Collegiate Sixth Form Centre

2014 - 2016

Maths (A*),
Further Maths (A),
Biology (A)
AS Chemistry (B)

Rokeby School

2009 - 2014

9 A*-B including A* for Maths

Projects

Gazetteer

JavaScript, HTML5, CSS3, jQuery, PHP, Bootstrap

Developed a comprehensive web application named Gazetteer that enables users to explore detailed geographical and socio-economic data of various countries. With the assistance of API's such as Leaflet, this interactive tool provides users with maps, major cities, airports, and essential country-specific information such as population, currency, and spoken languages. It also includes a currency converter feature for real-time financial calculations.

Company Directory

JavaScript, HTML5, CSS3, jQuery, PHP, MySQL, Bootstrap

Developed an intuitive "Company Directory" web application designed using JavaScript, PHP and MySQL to manage employee data within an organization. This application facilitates various operations such as viewing, searching, inserting, updating, and deleting employee records, providing a seamless user experience for data management.

Homie

JavaScript, HTML5, CSS3, React Native, Redux

Developed a home maintenance mobile app using React Native. Designed to help users keep track of home appliances. Users can store the model number, serial number, receipt, purchase date, and warranty information for their appliances in one place. The app features a calendar system that allows users to schedule appointments and keep track of upcoming events.
